

## PH METER

Code : G705

- A pH meter in engineering testing laboratories is used to measure the acidity or alkalinity of materials, especially in soil and water testing. It helps assess chemical properties that affect material behavior, ensuring compliance with standards and supporting accurate analysis for construction and environmental decisions.

### ORDERING INFORMATION

| Item Name                               | Item Code |
|-----------------------------------------|-----------|
| PH METER (Bench Type)                   | G705X001U |
| PH INDICATION PAPER                     | G705X002H |
| PH METER (Pocket Type)                  | G705X003B |
| PH CALIBRATION SOLUTION (pH 4 / 7 / 10) | G705X004H |
