ASPHALT > MARSHALL STABILITY

MARSHALL MOULD

Code : A010

- Used in preparing and compacting asphalt specimens. The prepared specimen is then used in Marshall Stability tests to determine the strength and flow of that specific Marshall Mix.
- The mould is made of a heavy-duty steel and protected against corrosion.
- The mould is supplied with base plate and collar.

STANDARDS

ASTM D6926 • EN 12697-10 • AASHTO t245

TECHNICAL SPECIFICATIONS

- Made of Galvanized Steel
- Diameter:

- Ø 4” B-010/4
- Ø 6” B-010/6
