CONCRETE > WORKABILITY & CONSISTENCY

VEBE CONSISTOMETER

Code : B130

- Used to determine the consistency of concrete using a vibrating table
- Equipped with Vibrating Motor having fixed amplitude and frequency
- ASTM C1176 model is used to prepare cylindrical test specimens from concrete when the standard procedures of rodding and internal vibration are not applicable

STANDARDS

ASTM C1170 • ASTM 1176 • EN 12350-3

TECHNICAL SPECIFICATIONS

- Fixed amplitude and frequency
- 220 - 240 V / 50 - 60 Hz

ORDERING INFORMATION

Item Name	Item Code
VEBE CONSISTOMETER - EN	B130X00EU
VEBE VIBRATOR for CYLINDERS - ASTM	B130X20AU
VEBE CONSISTOMETER - ASTM	B130X50AU
