HEAT-RESISTANT GLOVES

Code : G725

- Heat-resistant gloves in engineering testing laboratories are used to protect hands when handling hot equipment, samples, or containers, such as during oven drying or heating processes. They ensure safety and prevent burns during high-temperature tasks.

ORDERING INFORMATION

Item Name	Item Code
HEAT-RESISTANT GLOVES	G725X001H
RUBBER GLOVES	G725X002H
