LAB TOOLS > THEMOMETERS

ARMORED THERMOMETER w/ CASE

Code : G781

- Thermometers in engineering testing laboratories are used to measure the temperature of samples, materials, or equipment during experiments. They help ensure accurate temperature control and monitoring, which is critical for processes that are temperature-sensitive, such as curing, heating, or material testing.

ORDERING INFORMATION

Item Name	Item Code
ARMORED THERMOMETER w/ CASE - 200°C	G781X200H
