DESSICATOR

Code : W008

- A desiccator in engineering testing laboratories is used to store samples or materials in a dry environment by absorbing moisture from the air. It helps prevent sample contamination and ensures accurate results in tests that are sensitive to humidity, such as moisture content analysis or when working with hygroscopic materials.

ORDERING INFORMATION

Item Name	Item Code
DESSICATOR - 200 mm	W008G296H
DESSICATOR - 250 mm	W008G344H
DESSICATOR - 300 mm	W008G420H
